FOR IMMEDIATE RELEASE

USA TO PRESENT LARGEST VISITING COUNTRY GROUP AT ARAB HEALTH 2022

The USA Partnership Pavilion at Arab Health 2022 will be open for business from 24 January 2022 housing over 180 exhibiting companies

WALDWICK, NJ, JANUARY 22, 2022 - Arab Health 2022 will once again be the largest exhibition for the healthcare industry in the MENA region, taking place at the Dubai World Trade Centre from 24 – 27 January, drawing together companies, representatives and thought leaders from across the globe to create meaningful connections and support innovation in healthcare.

The USA Pavilion will host some 181 firms comprising returning stalwarts and 49 new-to-show exhibitors featuring hundreds of new and innovative products and solutions. The Partnership Pavilion will cover over 1.968 sqm of space – an increase of more than 952 sqm on the previous edition – with product capabilities encompassing the eight identified show sections including medical equipment and devices; imaging and diagnostics and healthcare and general services, to detail just a few. The strong U.S. participation at Arab Health 2022 makes the USA contingent the largest international country group in the show for yet another edition.

Information and connections for the USA Partnership Pavilion exhibitors can be found on the [USA Healthcare SHOWCASE™](http://www.healthcare.showcases.live) – www.healthcare.showcases.live - the world's first (and only) commercial media platform (CMP) dedicated to the healthcare industry.

"Overcoming the challenges of the past months has not been easy, but the size of the USA Partnership Pavilion and affiliated U.S. companies exhibiting at this year's Arab Health is a strong indicator that Team USA means business" sites Tom Kallman, President and CEO of Kallman Worldwide, USA Pavilion organizer at Arab Health. "And those companies and individuals unable to join physically are still able to make connections and join real-time via the USA Healthcare Showcase. It's great to be back at Arab Health with such a large group, recognizing the overall success of the healthcare industry".

ABOUT KALLMAN WORLDWIDE

Established in 1963, Kallman Worldwide creates unique opportunities for U.S. companies to strengthen business relationships around the world by maximizing their impact at international trade shows and through online digital events. With a flagship USA Partnership Pavilion; end-to-end exhibitor services; custom stand-building and creative services; corporate hospitality and networking programs, Kallman has helped more than 10,000 companies and collaborated with numerous associations and government agencies at over 1,500 industry and professional events in 46 countries. The company is a strategic partner of the U.S. Department of Commerce, and a proud recipient of the President's "E" and "E*" Awards for the company's active role in aiding U.S. exports and continuing recognition of noteworthy export promotion efforts. Kallman Worldwide is headquartered in Waldwick, New Jersey, with satellite offices in Washington DC and Houston, Texas. It also staffs a Latin America office in Santiago, Chile and bureaus in London, UK and Sydney, Australia. For more information, visit www.kallman.com.

FOR IMMEDIATE RELEASE

MEDIA ADVISORY

USA Partnership Pavilion Opening Ceremony followed by VIP TOUR of the USA Partnership Pavilion at Arab Health 2022

If Arab Health reflects the leading edge of the healthcare industry and marketplace in the MENA region, the U.S. contingent at this year's show leaves no doubt that America intends to expand its role as one of the region's leading suppliers.

America's Opening Ceremony will feature brief remarks and a photo opportunity with principals.

Invited Guest of Honour: Charge d'Affaires Sean Murphy, United States Embassy, Abu Dhabi, UAE
Host: Peter Kelley, Kallman Worldwide

WHAT:

Official Opening Ceremony of the USA Partnership Pavilion at Arab Health 2022

WHEN:

Monday 24 January 2022 at 11:00am

WHERE:

USA Meeting Point – Hall 1, Stand H1.C31
The USA Partnership Pavilion
Arab Health 2022

Centralized Connected Hub

A single solution eliminates the need to deploy multiple diagnostic instruments connected to a hub or other device. The Vitals360 is a self-contained solution that is cost effective and easy to deploy.

- Eliminate need for costly IT integration from multiple data sources
- Benefit from integrated and standardized data transfers from a cloud platform for any single patient
- Enables-real time physiologic data, allowing the clinician to have the right information to make the right decision at the right time
- Patient protected health information is secure and meets or exceeds HIPAA requirements including access controls, audit controls and integrity controls

Cloud-Based Platform

A comprehensive platform that provides near-real-time data transfer and instant accessibility that utilizes your technology or our Harris360 FDA listed Cloud.

- Secured data is available and ready for transfer to a patient's EMR/EHR system, provider phones via downloaded phone apps, or other available solutions in the market
- Cloud structure allows for convenient access to data analytics, predictive modeling, and infectious disease management

Single Multi-Diagnostic Device

Utilize a single device to capture and automatically transfer key patient vitals, helping clinicians be proactive instead of reactive.

- Provides ongoing monitoring remotely of patients who are high risk or have chronic diseases
- Simple enough for any patient to use and provides a comprehensive view of the patients' health from the comfort of their home
- Replaces several separate medical devices, making it ideal for care outside of a traditional office or healthcare facility
- Integrated solution used in conjunction with your active monitoring helps reduce risk of emergency room and return hospital visits
- Reduce the number of plugs, outlets, and batteries needed to utilize multiple traditional peripherals for monitoring patients; one easy to carry device that can be used anywhere

REMOTE PATIENT MONITORING MADE EASY

CONTACT INFORMATION

Email: HARRIS360@harriscomputer.com

Website: <https://harris360solutions.com>

Empower patients to maintain their health outside of traditional brick and mortar clinics and hospitals.

Introducing Vitals360®

We're pleased to introduce the latest tool for you to leverage in delivering Remote Patient Monitoring (RPM), Telehealth, or Point of Care solutions in your respective markets. With Cellular, Wi-Fi, and Bluetooth capabilities, healthcare providers can remotely capture key clinical vital sign measurements from a single self-contained device and directly upload the data by way of the Cloud into any clinical information system. The Vitals360 device went through rigorous clinical trials and FDA certification and offers secure data transfer to any product that can accept the physiologic measurements.

Monitorable Vitals Include:

Heart Rate

Temperature

Blood Pressure

Glucose

ECG Heart Rhythms

Blood Oxygen Saturation

Remote Connectivity

Designed for a mobile healthcare workforce, connect anytime, anywhere, globally.

- Leverage Wi-Fi or any cellular connection around the world
- Automatic uploading of data reduces the need for additional time spent trying to capture readings and manually transcribe or upload them
- No need to find connectivity and try to upload each vital sign measurement individually and no dependence on an unsecured connection or personal device
- If no Wi-Fi or cellular service is available, the vital sign measurements are stored securely on the device and then automatically uploaded when connectivity is present
- Reduces the cost of labor and increases the quality of data being captured at the point of care

Whether you use the device for Remote Patient Monitoring or Point of Care, our tools can help you deliver meaningful outcomes to your clients in the following areas:

- Hospitals & Clinics
- Post-Hospital Discharge
- Chronic Disease Management
- COVID-19
- Worksite Emergency Care
- Home Healthcare
- Government Healthcare
- Telehealth Services
- Health Screenings
- Corrections Facilities
- Transportation & Entertainment Industries
- Geographically Remote Locations

“Remote monitoring improves patient engagement in healthcare, which leads to improved health outcomes and satisfaction.”
