FOR IMMEDIATE RELEASE

Sixty Years of Trade Fair Experience Support Largest USA Pavilion at Arab Health and Highlight Commitment to U.S. / U.A.E. Trade

USA Partnership Pavilion expands to six halls (1, 3, 6, 7, SA, and S1) with a two-floor Exhibitor Meeting Point to facilitate U.S.- MENA connections.

Waldwick, NJ, USA and Dubai, U.A.E. / January 25, 2023 - With one of the largest national groups at this year's show, the United States of America plans to showcase groundbreaking healthcare and medical technology at Arab Health Exhibition 2023, MENA's largest event of its kind, taking place at Dubai World Trade Centre from 30 January to 2 February.

As one of the most important healthcare exhibitions in the world, this year's edition will attract more than 55,000 trade show and conference attendees and present tens-of-thousands of products and services from the 3,000+ exhibiting firms from 70 countries.

As the world leader in health and medical innovation, U.S. industry has been a steadfast partner in U.A.E.'s vision and plans for first-class infrastructure and medical treatment not only in the Emirates, but as a regional hub for reliable state-of-the-art healthcare services.

Since 1995 the centerpiece of the U.S. national effort at Arab Health has been the USA Partnership Pavilion, organized by Kallman Worldwide, Inc., in coordination with numerous government agencies, including the U.S. Departments of Commerce and State. The Pavilion will host 215 exhibitors, nearly 75% of the total American contingent, 63 firms will be new to the show. From personal care and safety products to over-the-counter remedies, specialized medical devices, equipment and treatment strategies, U.S. exhibitors in Dubai will represent a wide scope of America's smartest science, technology, and innovation.

"Kallman's sixty years of experience informs our decisions and guides our actions moving forward," says Tom Kallman, President & CEO of Kallman Worldwide. "As champions for global trade, the whole Arab Health experience – from 1995 to 2023 – has been a rewarding journey as we watch U.S. industry, SMEs as well as multi-national brands like Cleveland Clinic, become household names in the U.A.E. healthcare landscape."

"Six decades of experience has also taught us that global trade is a year-long conversation punctuated by events. For Kallman Worldwide, the yearlong conversations takes place on www.Sourcehere.com where international buyers and suppliers come together on an online marketplace designed to facilitate connections and sales 365/24/7. It's the perfect tool for sourcing products, companies, agents, and services and will power onsite connections in the USA Partnership Pavilion at Arab Health 2023."

FOR IMMEDIATE RELEASE

U.S. Companies at Arab Health 2023 to Display World-Leading Science and Technology to Healthcare Industry in Dubai

USA Partnership Pavilion expands to six halls (1, 3, 6, 7, SA, and S1) with a two-floor Exhibitor Meeting Point to facilitate U.S.- MENA connections.

Waldwick, NJ, USA and Dubai, U.A.E. / January 25, 2023 - With one of the largest national groups at this year's show, the United States of America plans to showcase groundbreaking healthcare and medical technology at Arab Health Exhibition 2023, MENA's largest event of its kind, taking place at Dubai World Trade Centre from 30 January to 2 February.

As one of the most important healthcare exhibitions in the world, this year's edition will attract more than 55,000 trade show and conference attendees and present tens-of-thousands of products and services from the 3,000+ exhibiting firms from 70 countries.

As the world leader in health and medical innovation, U.S. industry has been a steadfast partner in U.A.E.'s vision and plans for first-class infrastructure and medical treatment not only in the Emirates, but as a regional hub for reliable state-of-the-art healthcare services.

Since 1995 the centerpiece of the U.S. national effort at Arab Health has been the USA Partnership Pavilion, organized by Kallman Worldwide, Inc., in coordination with numerous government agencies, including the U.S. Departments of Commerce and State. The Pavilion will host 215 exhibitors, nearly 75% of the total American contingent, 63 firms will be new to the show. From personal care and safety products to over-the-counter remedies, specialized medical devices, equipment and treatment strategies, U.S. exhibitors in Dubai will represent a wide scope of America's smartest science, technology, and innovation.

U.S. companies will be showcasing new products at Arab Health, one of which being Woodway USA, Inc. at Booth #H7.A34. Woodway will be hosting demos of their new Boost 2 Anti-Gravity Treadmill, the latest in off-weighting treadmill technology.

Sleepnet Corporation, located at Booth #H1.B01, is launching two new nasal masks at Arab Health 2023: The Phantom 2 and the iQ2, both harnessing custom fit technology that mold to match the user's needs — something unique to only Sleepnet products.

"The ability to have interchangeable headgear is a game-changer for people. It is going to allow people the option to see which cushion is better for them while being able to use the same frame and headgear. It is an innovation that we take great pride in," said Tom Moulton, CEO of Sleepnet.

ELB Learning, exhibiting with World Trade Center Utah (Booth #H1.C58), will be attending Arab Health as a first-time exhibitor at this year's show. The company specializes in offering training

solutions for human behavior & performance and has experience in offering services to the MENA region for over 10 years.

“Six decades of experience has also taught us that global trade is a year-long conversation punctuated by events. For Kallman Worldwide, the yearlong conversations take place on www.Sourcehere.com where international buyers and suppliers come together on an online marketplace designed to facilitate connections and sales 365/24/7. Verify specific chemotherapy medications and batch compounded medications with DrugLog™

In-house quality control of IV and oncology preparations in compounding pharmacy

DrugLog™ is a cost-effective, robust QC solution for verifying the identity and concentration of in-house compounded injectable medications. An excellent complement to the high safety standards required internationally, DrugLog™ enables pharmacy to eliminate costly testing of all aspects of high-performance liquid chromatography (HPCL). It also helps save time, providing pharmacy with instant results as an on-site QC device, preserves a medication's usability before expiration, and adds safety by ensuring the right drug and concentration reach every patient -- improving your compounded processes and reducing compounding errors. DrugLog™ is designed for acute care hospitals, specialty hospitals (e.g. Oncology), infusion centers (e.g. infusion pharmacies), and sub-acute hospitals.

eVent Medical

eVent Medical NEWS

BOOTH #H1.G01 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

How hospital reduce the Length Of Stay on a ventilated patient in ICU

Come and see our Auto Control Mode, weaning the patient autom, to reduce dramatically Length Of Stay
Mechanical ventilation manufacturing began in California in the 1950s by small ventilator companies based in San Diego, Los Angeles, Riverside and Palm Springs.

In March of 2000, several respiratory therapists and engineers broke away from larger companies to form their own ventilator company . . . one that would incorporate their experience and passion in the art of mechanical ventilation into the global center of the industry. eVent Medical's founders understood that success is derived from listening to the customer and tending to their needs. They spent their dollars and resources on developing creative, cost-effective, high performance technology and solutions.

eVent Medical has maintained continuous growth for over a decade, bringing yet more veterans of the ventilator industry to the team while maintaining our sole focus on mechanical ventilation. We are proud that we remain competitive with large, multinational businesses by adopting and developing 21st century technology in pneumatics, electronics and software technologies in order to offer:

- Faster and more accurate control of the state-of-the-art pneumatic components
- Introduction of the newest clinical development and algorithm in order to reduce the Length Of Stay (LOS) on the ventilator and to minimize Ventilator Acquired Pneumonia (VAP) risks on the patient. But also the new automatic weaning mode, the Auto Control Mode, save a lot on ventilator days. If a patient on a ventilator cost the hospital \$ 200 per day, the average savings per year would be at least \$ 10.000
- Comprehensive user experience with clinician-focused logics, control software power and advanced graphic capabilities
- INSPIRATION from attention to all details and EVOLUTION from real, in-hospital experience.

At eVent Medical, our resources are focused to serve our customer by continuously advancing our technology for the essential need of life support and fast weaning of the patient, minimizing potential accidents in the critical care environment. Our passion is, and has always been, mechanical ventilation with the highest discipline to design, produce and distribute only the best products in the world. Our entire team lives and breathes ventilator care.

Flagship Surgical LLC NEWS

BOOTH #H1.C12 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

NEW PRODUCT RELEASE! EcoDri-Safe Absorbent Rolls

Keep your surgical suites clean and reduce turnover times.

Easily contain fluids and streamline OR cleanup procedures with Flagship Surgical's EcoDri-Safe™ Absorbent Rolls. These economical, disposable floor pads are ideal for use wherever fluids build up, including in the OR, around scrub sinks and on lab station floors. Our super absorbent, disposable floor pads eliminate expensive laundry costs and reduce OR turnover times.

EcoDri-Safe Rolls help prevent slips and falls, and minimize the transmission of harmful contaminants to healthcare providers. OR clean-up times are significantly reduced, and with efficient disposal these pads help prevent cross-contamination.

The super absorbent pad material is manufactured with up to 33% recycled materials. An impermeable, non-slip poly backing (optional) promotes safety by locking liquid within the absorbent material, and also helps keep the pad firmly in place.

EcoDri-Safe Rolls are available in 100 foot rolls, both with and without the impermeable, non-slip poly backing, and are perforated every 20 inches for easy tear-off.

Our gold standard, economical solution for keeping floors safe & dry for your staff.

EcoDri-Safe™ Absorbent Rolls are ideal for a wide array of specialties, including:

- Orthopaedic Sports Medicine Surgery
- Cardiothoracic Surgery
- Trauma Surgery
- Transplant Surgery
- General Surgery
- Urologic Procedures
- Plastic Surgery
- Laparoscopic Surgery
- Cystoscopy
- Labor & Delivery/C-Sections

Ordering Information:

- EcoDri-Safe™ Absorbent Roll
 - Catalog Number: USA-ECO100 (1 roll/box)
 - Product Dimensions: 28" x 100'
- EcoDri-Safe™ Absorbent Roll w/ Poly Backing
 - Catalog Number: USA-ECO100PLY (1 roll/box)

- Product Dimensions: 28" x 100'
- Wheeled Multi Dispenser for EcoDri-Safe™ Absorbent Rolls (sold separately)

Our companion Wheeled Multi Dispenser allows for easy storage and transportation of the EcoDri-Safe Rolls throughout the surgical facility, freeing up valuable shelf and storage space in the Operating Room. No heavy lifting required!

FOR IMMEDIATE RELEASE

GCX Acquires Jaco

Acquisition Augments GCX's Line of High-Quality Mounting Solutions

PETALUMA, CA, USA, December 9, 2022 – GCX Mounting Solutions (“GCX”), a portfolio company of Audax Private Equity (“Audax”) and a global leader in the design and manufacturing of healthcare-focused mounting and mobility solutions, announced the acquisition of Jaco, Inc. (“Jaco”). Financial terms of the transaction were not disclosed.

Based in Franklin, MA, Jaco designs, manufactures, and sells a full line of branded point-of-care IT workstation solutions for the healthcare markets, including powered carts, nonpowered carts, wall arms, and video-presentation carts. The acquisition strengthens GCX’s broad portfolio of medical instrument and mounting solutions with the addition of Jaco’s battery-powered EVO™ Series mobile carts. The deal also adds new commercial and manufacturing competencies.

“We are very excited to partner with the entire Jaco team. Like GCX, Jaco has a longstanding history of providing high-quality designs that address the needs of healthcare workers with user responsiveness and ergonomic advantages,” said Del France, CEO of GCX. “Jaco’s products are lightweight, simple to use, and offer safe, durable, and reliable performance. Jaco’s product portfolio is synergistic with GCX and supports our mission to deliver high-quality products, services and innovations that empower clinicians to improve healthcare outcomes.”

The acquisition of Jaco augments GCX’s broad portfolio of medical-instrument and mounting solutions in the healthcare market. The deal also provides access to state-of-the-art manufacturing with world-class design, metal fabrication and electronics integration services to expand the combined company’s OEM capabilities. Jaco and GCX will be able to help simplify and enhance the customer experience with a broader offering of healthcare mounting products and services from a single partner.

“GCX is the perfect partner to accelerate and amplify Jaco’s reach,” said David Wong, Managing Director of Audax. “We will continue to invest aggressively in GCX and its family of best-in-category products.”

Fredrikson & Byron, PA served as legal counsel and Cain Brothers, a division of KeyBanc Capital Markets, served as financial advisor to GCX and Audax during this transaction. Mirus Capital Advisors, Inc. served as exclusive financial advisor to Jaco.

Neotech Celebrates 35 Years!

Making a Difference with the Simple, Innovative Products

Our dedicated team members have been Making a Difference for 35 years! That’s 35 years of developing and manufacturing innovative medical devices. Thirty-five years of helping babies, children, and their caregivers. Thirty-five years of distributing millions of products all over the world.

“I think I am most proud of the impact we’ve made as a company over the last 35 years,” said Craig McCrary, Neotech President. “Impact to employees, impact to clinicians, and impact to patients and parents. We’ve done things that have made a positive difference in many lives around the globe.”

Craig, who has been with Neotech for over 30 years, credits company success to simple, unique products that are clinician-driven and fill a need.

Orion Innovations Group NEWS

BOOTH #H1.D15 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

MedLite ID by Orion Innovations Expands Internationally

MedLite ID smart-lites reducing infusion errors expands to Saudi Arabia, South Africa, and Europe.

MedLite ID, created by Orion Innovations, has expanded its smart-lite system for IV lines designed to improve infusion safety to the regions of Saudi Arabia, South Africa, and Europe. With this expansion, Orion Innovations continues to advance a new standard of care in multiple world geographies, adding to its growing base in the USA.

The MedLite ID smart-lites are attached to any standard diameter IV line, specifically the commonly called “Primary Medication” line flowing saline, and use for intermittent medications and often electrolytes or anti-biotics. MedLite ID aims to assist in making infusion adverse drug events (ADEs) “never events.” With up to 90% of all IV infusions containing at least one error, and infusion ADEs representing 56% of all errors, MedLite smart-lites provide a simple means to illuminate and identify this “Safe Line” and access the port in seconds; avoiding all too common mistakes of manually tracing this

line through what is commonly called the “spaghetti syndrome” of tangled IV lines. The average number in the US of which is eight in the ICU.

“With an evidence-based error rate of a compounding 3% for each IV line after the first one, and no current solution to quickly and simply identify, trace, and access the Safe Line port, we created MedLite ID. Nurses are buried, burned out, and need tangible solutions that simply work. MedLite ID smart-lites create an interdepartmental illumination solution to span the full patient journey, every shift, every department and allow the nurse to access this critical port in seconds while avoiding a potentially severe infusion Adverse Drug Event” Rodney Schutt, CEO Orion Innovations.

With six utility patents in the US and multiple pending internationally, MedLite ID is available in the US for acute and VA sectors, Saudi Arabia via Tamar, S. Africa via Abela Medical, and Italy via Praesidia SRL.

At Orion Innovations, we focus on new and disruptive technologies that improve patient safety for the highest quality outcomes. Grounded in the principle that robust solutions can be simple to adopt, we think about caregivers and facilities, and how we can streamline the best possible patient experience through healthcare heroes. Orion Innovations' portfolio includes the MedLite ID Smart-Lite solution (www.medliteid.com) for the acute healthcare market to prevent infusion Adverse Drug Events, NoGag (www.nogag.com) as a solution to dental procedures and patients impacted by the gag reflex, and Oxyswitch as an oxygen switching device for the hospital reducing Time-Without-O2. All smart, simple, and patented. For additional information, please click here: www.medliteid.com

BOOTH #H1.D50 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

PediaMetrix is redefining the way infant head deformities are detected, monitored, and treated

SoftSpot is the only FDA-cleared mobile app for cranial measurements

PediaMetrix developed SoftSpot, the only FDA-cleared mobile app for measuring infants' cranial deformities, which can assist pediatricians and parents with early detection, monitoring, and treatment of head deformity conditions. Hundreds of infants have been scanned using SoftSpot and currently 20 US pediatric practices are using it and growing. Founders Fereshteh and Reza believe that SoftSpot can improve patient outcomes, decrease patient costs in the long-term, and increase revenue for providers.

Qosina NEWS

BOOTH #H1.B11 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

Qosina Corp. Receives ISO 45001 Certification

Qosina is pleased to announce it has received the ISO 45001 certification, the international standard for occupational health and safety.

ISO 45001 specifies requirements for an occupational health and safety (OH&S) management system and gives guidance to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving their OH&S performance.

“I am thrilled that we are able to add ISO 45001 to our list of ISO designations,” said Scott Herskovitz, President and CEO of Qosina. “Receiving this certification reinforces our commitment to maintaining a high standard of quality and safety in our operations so that we can ensure the safety of our employees and stakeholders and offer exceptional service to our customers.”

To view all of Qosina’s ISO certifications, visit <https://www.qosina.com/qosina-iso-certifications>.

Qosina Expands Class VI Tubing Portfolio for Single-Use Medical Device and Bioprocess Applications

Qosina, a global supplier of OEM single-use components to the medical and bioprocess industries, has expanded its Class VI tubing portfolio with several new brands including Venabio®, Braided Flexelene™, Flexelene 135C™ and EJ Prene™.

Qosina offers an extensive selection of stock and custom tubing in conveniently packaged small coils for prototyping and extended lengths for large-scale production requirements. Choose from more than 200 options in a variety of brands, types, diameters, durometers and materials.

Qosina carries a broad selection of these well-known Class VI tubing brands:

- PharMed® BPT
- SaniPure™ BDF™
- TuFlux®
- C-Flex®
- Tygon®
- PharMed® BPT
- Sani-Tech®
- Venabio®
- Braided Flexelene™ 135C
- Flexelene™ 135C
- EJ Prene™

Custom tubing configurations are available to meet exact specifications including cut-to-length pieces and custom coil sizes, colors and materials.

Qosina is a one-stop source for medical and single-use bioprocess tubing, with low minimum order quantities, a liberal sampling policy and bill of material kitting, all supported by regulatory documentation and backed by Qosina’s assurance of supply. Explore Qosina’s extensive selection of tubing options at qosina.com/tubing.

ABOUT QOSINA

Founded in 1980, Qosina is a leading global supplier of OEM single-use components to the medical and pharmaceutical industries. Qosina’s philosophy is to address its customers’ need to reduce time to market by providing thousands of stock components. The company’s vast catalog features more than 5,000 products shown in full-scale illustrations on a one-centimeter grid. Qosina offers free samples of most items, low minimum order requirements, just-in-time delivery, modification of existing molds, and new product design and development. Qosina is ISO 13485, ISO 9001, ISO 22301 and ISO 14001 certified, and operates in a 95,000 square-foot facility with an ISO Class 8 Clean Room. To learn about Qosina’s full component offering, which includes the newest products, visit www.qosina.com or call +1 (631) 242-3000. Visit Qosmedix, Qosina’s cosmetics division, at www.qosmedix.com. Sleepnet Corporation NEWS

BOOTH #H1.B01 IN THE USA PARTNERSHIP PAVILION AT ARAB HEALTH 2023

Sleepnet Releases Two New Nasal Masks Featuring Custom Fit Technology

Sleepnet has launched new innovative nasal masks to their product lineup: the Phantom 2 and the iQ2.

The Phantom 2 is a moldable low-profile nasal mask with Sleepnet’s patented AIR°gel® cushion which provides Custom Fit Technology to accommodate various facial structures, weight changes, and facial asymmetry. The Custom Fit Technology feature of these two masks means that the shell of the mask can be molded to match one’s needs, which is unique to Sleepnet products. It is a one-size cushion with a large fitting range. It also features a 360-degree swivel frame that allows for optimal tube positioning, and less tube dragging for active sleepers, which adds significant enhancement to patient care. The iQ2 has the same features as the Phantom 2, but it is a lightweight nasal mask, rather than a low-profile mask. The two nasal masks also feature the TruFit Headgear with magnetic clips, for comfort and the ability to be removed easily and quickly.

“The ability to have interchangeable headgear is a game-changer for people. It is going to allow people the option to see which cushion is better for them while being able to use the same frame and headgear. It is an innovation that we take great pride in,” said Tom Moulton, CEO of Sleepnet.

Sleepnet's patented AIR°gel® technology provides a comfortable seal that conforms to the face and nasal bridge, providing a superior fit and increased comfort over competing silicone masks. Sleepnet's masks also offer one-of-a-kind features such as Active Headgear Connectors, Quick-Release Headgear Connectors, and Touchless Spacebars.

FOR IMMEDIATE RELEASE

Canadian Presence at Arab Health Exhibition Reaffirms Canada-U.A.E. Trade Relations

The Canada Pavilion — located in Halls P, R, 6, and 7 — consists of 32 exhibitors, 14 new to market and 15 new to the show.

Waldwick, NJ, USA and Dubai, U.A.E. / January 20, 2023 — A fleet of Canadian companies offering advanced, unique healthcare solutions will be exhibiting at Arab Health Exhibition 2023 in the Canada Pavilion from January 30 – February 2, at Dubai World Trade Centre.

Arab Health is the largest event of its kind in the Middle East. This year's edition is projected to attract 51,090 trade show attendees across the four-day exhibition, housing 3,000 exhibiting healthcare companies from 70 countries.

According to the International Government of Canada's website, the U.A.E. was Canada's second most important merchandise trade partner in the Middle East and North Africa (MENA) in 2021, following Saudi Arabia. In 2021, bilateral trade in goods between Canada and the U.A.E. was \$2.5 billion, an increase of 24.6% over 2020. Canadian merchandise exports to the UAE in 2021 were nearly \$2 billion in 2021, an increase of 11% from 2020. The centerpiece of the national effort at Arab Health is the Canada Pavilion, organized by Kallman Worldwide, Inc., back after a two-year hiatus.

The Pavilion has expanded to four halls (P, R, 6, and 7) and will host 32 exhibitors, 15 for the first time at the event. From personal care and safety products to over-the-counter remedies, specialized medical devices, equipment and treatment strategies, Canadian exhibitors in Dubai will represent a wide scope of Canada's smartest science, technology, and innovation.

Of these companies, Distripharm Inc. (Booth #R.A10) will be launching a new product line this year at Arab Health. Trailblazing the marketplace, KIDZ is the first natural health care line created for infants and preadolescents.

First-time exhibitor at Arab Health 2023, RamSoft (Booth #H6.G59), provides the world's first imaging EMR. OmegaAI is a cloud-native serverless platform that consolidates VNA, Enterprise Imaging, PACS, RIS, simplified image exchange/sharing, routing & storage, a zero-footprint (ZFP) viewer, unified worklist, radiologist reporting, document management, peer review, patient portal, real-time business intelligence & analytics, automated front desk, billing, and an app marketplace.

TCE Group / PK+ Telehealth will be exhibiting with the Ontario Ministry of Economic Development Job Creation and Trade, located at Booth #H7.A50A. The PK+ Telehealth Suite™ offers digital applications that provide healthcare providers and their patients with advanced, convenient, and

secure access to a wide range of telehealth services, as well as pharmacy order processing and tracking.

The Pavilion is a well-established destination for buyers looking for an efficient way to meet a critical mass of leading suppliers, an on-site business center for Canada exhibitors looking to maximize their exposure and impact at the event, and a networking forum for all to share ideas and insights.

Entering its 60th year in 2023, Kallman Worldwide will be representing the North American presence at the show as returning advocates for global trade. With over 25 years of experience at Arab Health, their industry and show knowledge far exceed that of any other Canadian pavilion organizers.

For more information about the Canada Pavilion at Arab Health 2023, please visit <https://kallman.com/shows/arab-health-2023-canada-pavilion>.

To explore the Pavilion's Official Digital Directory on Sourcehere.com, please visit <https://sourcehere.com/exhibit/1396>

###

ABOUT KALLMAN WORLDWIDE, INC.

Established in 1963, event organizer Kallman Worldwide creates unique opportunities for Canadian companies to strengthen business relationships around the world by maximizing their impact at international trade shows and through online digital events. With a flagship Canada Partnership Pavilion; end-to-end exhibitor services; custom stand-building and creative services; corporate hospitality and networking programs, Kallman has helped more than 10,000 companies and collaborated with numerous associations and government agencies at over 1,500 industry and professional events in 46 countries. Kallman Worldwide is headquartered in Waldwick, New Jersey, with satellite offices in Washington DC and Houston, Texas. It also staffs a Latin America office in Santiago, Chile and bureaus in London, UK and Sydney, Australia. For more information, visit www.kallman.com.

ABOUT SOURCEHERE

Sourcehere is a 24/7/365-day platform that helps businesses of all sizes get in front of an international audience of buyers. The easy-to-use platform allows buyers to find products, services, and the companies that provide them in seconds. Users can also message company representatives directly on the platform. As a partner of Kallman Worldwide, Sourcehere is the Official Digital Directory for the Canada Pavilion, ensuring your products get in front of your target audience before, during, and after the show.

RamSoft | OmegaAI

RamSoft NEWS

BOOTH #H6.G59 IN THE CANADA PAVILION AT ARAB HEALTH 2023

The World's first imaging EMR

RamSoft is the SaaS imaging IT vendor that helps healthcare providers deliver faster, empowered care

RamSoft is a healthcare IT SaaS leader in developing customizable, feature rich imaging workflow solutions, including the world's first Imaging EMR, OmegaAI. OmegaAI is a cloud-native serverless platform that consolidates VNA, Enterprise Imaging, PACS, RIS, simplified image exchange/sharing, routing & storage, a zero-footprint (ZFP) viewer, unified worklist, radiologist reporting, document management, peer review, patient portal, real-time business intelligence and analytics, automated front desk, billing, an app marketplace and so much more. OmegaAI's cloud-native architecture supports data consolidation to give enterprises the flexibility that is required for effective cross-country deployment.

OmegaAI has even more next-generation features that set it apart from all other vendor solutions. For starters, the federated identity management delivers flexibility for user access which alleviates users from needing to remember their credentials for another system. As OmegaAI follows FHIR standards, users have access to comprehensive patient records. By using Elasticsearch, OmegaAI can deep-dive search through thousands of records or data items in mere seconds. OmegaAI is purpose-built to drive sustainable ROI, seamlessly connect health networks and patients, provide instant access to imaging, and automate the entire patient journey from referral to study results.

OmegaAI's apps include Root and Blume. Root is a business intelligence and visualization tool that provides accurate real-time reporting and analytics. Blume is the patient portal of the future. It's a single app connecting patients, their doctors as well as family members. Blume allows patients to view their entire record – including images.

OmegaAI's cloud-native architecture supports data consolidation to give enterprises the flexibility that is required for effective cross-country deployment.

OmegaAI has even more next-generation features that set it apart from all other vendor solutions. For starters, the federated identity management delivers flexibility for user access which alleviates users from needing to remember their credentials for another system. As OmegaAI follows FHIR standards, users have access to comprehensive patient records. By using Elasticsearch, OmegaAI can deep-dive search through thousands of records or data items in mere seconds.

OmegaAI is purpose-built to drive sustainable ROI, seamlessly connect health networks and patients, provide instant access to imaging, and automate the entire patient journey from referral to study results.

OmegaAI's apps include Root and Blume. Root is a business intelligence and visualization tool that provides accurate real-time reporting and analytics.

Blume is the patient portal of the future. It's a single app connecting patients, their doctors as well as family members. Blume allows patients to view their entire record – including images.

ABOUT RAMSOFT | OMEGAAI

With 25+ years of experience in serving healthcare providers globally, RamSoft has in-depth knowledge in facilitating workflow automation, improving clinical outcomes as well as accelerating care. Committed to saving lives through faster, empowered care, RamSoft's innovative products – ranging from an Imaging EMR, a suite of PACS solutions, to both a DICOM® viewer and DICOM® router – enable healthcare providers to elevate their clinical experiences into today's "smartphone world" by bolstering the democratization of healthcare (In other words, making it simple for patients to receive the care they deserve when they need it!).

RamSoft was originally founded in 1994 by visionary Dr. Ramanathan along with his son, the company's CEO, Vijay Ramanathan. Within a decade, Vijay, and his brother (and also RamSoft's CTO), Siva, successfully built further upon the company's foundational scope in medical imaging innovation by designing and developing an award-winning line of 100% web based PACS and RIS solutions, PowerServer™. Developed on this solid foundation of experience, OmegaAI was created to address key imaging infrastructure-related issues raised by radiologists including better workflow customizations, improved productivity, easier integration with legacy systems...all towards offering a more holistic healthcare IT environment that empowers patients. To date, countless healthcare organizations worldwide have successfully transformed their patient care delivery and optimized their clinical operations in utilizing RamSoft's SaaS solutions.

A global-focused company with the dynamic, growth-oriented feel of a start-up, RamSoft has headquarters located in Toronto, Ontario, Rancho Cucamonga, California, and Bengaluru, India. Patient-centric, value-based modern healthcare is within reach now more than ever! Discuss the exciting possibilities with our team. For additional information, please click [here](#).
