## **USA PARTNERSHIP PAVILION OPENING CEREMONY AND VIP TOUR AT ADIPEC 2023**

Over 100 U.S. companies are exhibiting in the USA Partnership Pavilion at ADIPEC 2023, including 19 first-time exhibitors and 11 exhibitors new to the market. The Pavilion will span across 2,135+ square meters of exhibition space in Halls 7 & 12 – *the largest USA Partnership Pavilion footprint to date* – with 5 U.S. companies exhibiting in the first-ever USA Pavilion in the Decarbonisation Zone.

On Monday, October 2 at 12:30PM, U.S. exhibitors, distinguished guests, and visitors will gather for remarks and a ceremonial ribbon cutting to officially open the USA Partnership Pavilion for business. The ceremony will feature brief remarks and a photo opportunity with principals. Immediately following the ribbon cutting, VIPs will tour the Pavilion to greet U.S. exhibitors at their booths.

### **HOST:**

Tom Kallman, President & CEO, Kallman Worldwide

### **INVITED GUEST OF HONOR:**

Ambassador Martina Strong, U.S. Ambassador to the UAE

### **WHAT:**

Official Opening Ceremony of the USA Partnership Pavilion at ADIPEC 2023

### **WHEN:**

Monday, October 2, 2023

Opening remarks begin at 12:30PM

### **WHERE:**

USA Partnership Pavilion

The Meeting Point

Booth #7350

ADIPEC 2023

### **ABOUT KALLMAN WORLDWIDE**

Since 1963, Kallman Worldwide has worked with individuals and organizations in more than 50 nations to advance global trade in STEM-driven industries. The company's portfolio of international trade shows, event management services, custom stand building and design, global supply chain networking tools, and workforce advocacy programs connects thousands of buyers and suppliers to more opportunities around the world every year. As an international U.S. representative, Kallman is a strategic partner of the U.S. Department of Commerce and a proud recipient of the President's "E" and "E Star" Awards for its active role in aiding U.S. exporters and in recognition of its export promotion efforts. The company is headquartered in Waldwick, NJ, with U.S. satellite offices in Washington, DC and Houston, TX, a Latin America office in Santiago, Chile, and a bureau in London, UK. For more information, visit [www.kallman.com](http://www.kallman.com).

## **CheckPoint Pumps and Systems NEWS**

BOOTH #7550 IN THE USA PARTNERSHIP PAVILION AT ADIPEC 2023

### **CheckPoint Launches its series Electric Pump**

CheckPoint's Series ATP is an economical electric pump solution with diverse capabilities, both onshore and offshore. Well-suited for solar, AC, and DC service, this pump features expandability to two heads, each with mechanical adjustment offering independent flow control from 0 to 100%. The Series ATP's robust drive mechanism ensures minimal wear, smooth operation, and long-term durability. [Learn more](#)

CheckPoint was founded on the idea that chemical injection should be better—that a pump should withstand the harsh conditions of the field and maintain its integrity for a long time, with the use of solid engineering and reliable materials. This idea—and the pump originally created from this idea, the Series 1250—formed the bedrock of our company and drives everything we do. By 1993, CheckPoint had succeeded in creating a product that represented the culmination of thousands of man-hours and successfully addressed every shortcoming identified in other pneumatic products. As the product line has expanded to include electric and solar power sources, larger flow rates and pressures, accessories, and complete injection systems, we have not forgotten where we came from. It all started with a single idea.

30 years later, the Series 1250 has not only remained a client-favorite, but it has set a standard in the industry for a high-quality, well-engineered, durable product. With expertise in engineering and chemical injection solutions, CheckPoint has always strived to offer the best products to our customers. We would like to take this opportunity for our 30th anniversary to thank our clients for being with us and supporting our growth. Please join us in celebrating 30 years of excellence .

BOOTH #7431 IN THE USA PARTNERSHIP PAVILION AT ADIPEC 2023

### **Introducing the KeyDrill Gyro While Drilling Tool (KGWD): Precision in Challenging Environments**

We are thrilled to introduce our latest innovation, the KeyDrill Gyro While Drilling Tool (KGWD). Designed to excel in environments with magnetic interference, the KGWD tool revolutionizes drilling operations, offering real-time gyro surveys without the need of tripping in and out a wireline tool.

#### **Key Features:**

1. **Exceptional Durability:** The KGWD system utilizes advanced 3-axis solid-state sensors, renowned for their durability. This ensures precise measurements even in the most extreme conditions, including shock and vibrations.
2. **Unwavering Precision:** All measurements are meticulously aligned with geographic north, rendering the system impervious to magnetic interference. This guarantees accurate data collection regardless of magnetic disturbances.
3. **Versatile Application:** The KGWD tool is highly versatile and can be effectively deployed within casing, drill pipes, and even in areas with magnetic disturbances, making it an invaluable asset in a variety of drilling scenarios.
4. **Swift Data Collection:** In just 30 seconds, the KGWD system can measure the Earth's rotation and gravity fields, allowing for rapid progress in drilling operations.
5. **Cutting-Edge Dual System:** The KGWD employs a dual system, combining a stable platform with strapdown inertial navigation and our proprietary Adaptive Roll Technology. This not only offers high roll tolerance but also enables surveying speeds of up to 200 meters per minute.
6. **Reliable Accuracy with Kalman Filtering:** Powered by robust Kalman Filtering, the KeyDrill GWD ensures consistently accurate measurements, instilling confidence in the data collected.

#### **Features and Benefits Summary:**

- Solid-state sensors eliminate the need for field calibration.
- 3-axis True North Finding, providing a horizontal Gyrocompass.
- Continuous survey mode allows for swift traversing at speeds of up to 200m/min.
- Offers exceptional accuracy and dependability, even in challenging conditions.

The KeyDrill Gyro While Drilling Tool (KGWD) represents a leap forward in drilling technology, combining precision, durability, and adaptability. It is engineered to meet and exceed the demands of modern drilling operations.

For further information or to inquire about integrating the KGWD into your operations, please visit our website at [www.keydrill.com](http://www.keydrill.com) or contact our dedicated team, Jon Weatherly (512) 865-0623 or Ian Pirsch (713) 373-6144.

### **"Lift-Off" Pipe Supports NEWS**

USA PARTNERSHIP PAVILION AT ADIPEC 2023

#### **"Lift-Off" Pipe Supports worldwide launch of our anti-corrosion Pipe Support Barrier (LOR).**

*The best way to mitigate pipe support corrosion is to use our LOR/LORP pipe support Barrier.*

"Lift-Off" Pipe Supports is a pipe support specialty company from Lake Charles, Louisiana.

We design, manufacture and install our pipe supports in conjunction with trusted affiliated companies.

Our "Lift-Off" Rests (LOR) and our "Lift-Off" Rest Pipe (LORP) are installed worldwide to combat the ever-growing demand for a component to prevent corrosion between the process Pipe and the supporting structure. Our LOR/LORP are easy to install, have a large temperature range (-320 to +500F), is flame and UV resistant.

We have authorized agents/distributors in South America (Brazil), Singapore, South Africa and Nigeria. All other countries are serviced from our headquarters in Lake Charles, Louisiana.

#### **MEYER NEWS**

BOOTH #7446 IN THE USA PARTNERSHIP PAVILION AT ADIPEC 2023

#### **MEYER MIDDLE EAST INC. ANNOUNCEMENT**

*1 August 2023* - MEYER is pleased to announce an expansion of its capabilities and international presence in the Middle East with the formation of MEYER Middle East Inc. (MEYER Middle East).

MEYER Middle East Inc. has signed a strategic agreement with Al-Rushaid Oil & Gas, a prominent and leading KSA owned company, and will be based in Kingdom of Saudi Arabia.

This collaboration and investment from MEYER will allow MEYER Middle East to service the Middle East region. The new partnership will extend MEYER's reach into global markets in support of U.S., Europe, the Middle East and beyond.

MEYER will begin to service our customers by Q2-23 as we work to construct a purpose-built MEYER facility.

For both Onshore/Offshore customers in Saudi Arabia, Bahrain and Kuwait, MEYER Middle East will support aftermarket services, field services and new equipment sales.

Serviced equipment includes, but not limited to, API16D Accumulator Units, MEYER SPYDER® Grease Manifolds, Standard & High Flow Grease Units, Cloud Based Data Support, Valve Skids and Missile Remotes, among others.

Future market growth by MEYER Middle East is planned for Qatar, UAE, Oman and Egypt.

**PG SEALING TECHNOLOGIES MANUFACTURING LLC NEWS**  
BOOTH #7555 IN THE USA PARTNERSHIP PAVILION AT ADIPEC 2023

**Patriot Sealing and Techno Cast Group SPA Forge Exclusive Agreement**

*The official agreement was inked by Patriot Sealing's CEO, Kris Kolb, and Techno Cast's CEO*

Patriot Sealing, a leading gasket manufacturer headquartered in the United Arab Emirates, is thrilled to announce the signing of an exclusive agreement with Techno Cast Group SPA, a prominent Algerian company specializing in maintenance solutions across diverse industries.

The official agreement was inked by Patriot Sealing's CEO, Kris Kolb, and Techno Cast's CEO, during a momentous occasion at the USA Partnership Pavilion ADIPEC 2023 on Tuesday, October 3rd.

Patriot Sealing is renowned for its expertise in manufacturing Flange Isolation Kits, a critical component within the Algerian gas fields to combat flange corrosion. The ever-evolving landscape of gas extraction and export facilities in Algeria has underscored the pressing need for sophisticated gasket solutions, coupled with onground technical support. Patriot Sealing boasts a comprehensive range of gaskets and specialty fasteners, catering to a wide spectrum of services, all backed by a team of highly experienced professionals hailing from various sectors of the industry.

Established in 2008, Techno Cast Group SPA has achieved significant prominence as a provider of maintenance solutions to process industries, including mining, chemicals, and food processing. In recent times, the company has made substantial inroads into the oil and gas sector, securing substantial contracts that have paved the way for this strategic partnership with Patriot Sealing.

Patriot Sealing is fully committed to actively supporting Techno Cast at the upcoming NAPEC Exhibition scheduled for November. This collaboration provides a unique opportunity to engage with Algeria's major players in the gas industry, further solidifying Patriot Sealing's presence in this vital sector.

---

**Patriot Sealing Empowers "Make it in the Emirates" with Local Production of Flange Isolation Kits**

Patriot Sealing, a distinguished gasket manufacturer, proudly announces a groundbreaking milestone in its journey, signaling unwavering commitment to the "Make it in the Emirates" initiative. This landmark achievement follows the successful commissioning of a high-capacity water jet cutting machine in September, heralding the commencement of manufacturing operations in October 2023.

One of the most remarkable facets of this expansion is the in-house production of Fire Safe isolation kits, a feat accomplished with the invaluable guidance of industry stalwarts. The collaborative efforts of Mr. Max Rowland, boasting over 45 years of experience in the Gasket Industry, Mr. Kris Kolb, President of the Patriot Group, and the expertise of Mr. Ben Kramer in Fire Safe FIK, have culminated in the creation of cutting-edge solutions tailored for esteemed clients such as ADNOC and other major end-users.

Patriot Sealing's flagship Commander FS isolation gaskets, rigorously tested and accredited to meet the stringent API 6FB standards, have earned accolades for their performance in the 6" 300 and 4" 2500 specifications. This accreditation holds particular significance for ADNOC's offshore operations, operating under extreme pressures, where the demand for a proven and reliable design is paramount.

As an approved supplier for ADNOC, Patriot Sealing is unwavering in its dedication to expanding its product portfolio within the UAE. Presently, the company manufactures an array of gaskets, including Spiral Wound, Metal Jacketed, Kammprofile, and soft cut gaskets. Additionally, it maintains substantial inventories of sheet materials and Ring Type Joints at its strategic Abu Dhabi location, ensuring swift and efficient service for clients.

Santosh Kumar, the resolute Managing Director of Patriot Sealing, underscores the company's steadfast commitment to the "Make it in the Emirates" initiative. He asserts, "Patriot has experienced remarkable expansion in response to market demands, and we remain steadfast in our pledge to foster sustainable manufacturing practices that not only benefit the nation but also our esteemed customers."

Patriot Sealing's substantial investment in local production underscores its dedication to supporting the UAE's vision for self-reliance and self-sufficiency. The company eagerly anticipates contributing to the nation's economic growth while further fortifying its partnerships with local industries.

#### **ABOUT PATRIOT SEALING**

Patriot Sealing is a premier manufacturer of gaskets and sealing solutions, steadfastly committed to delivering top-notch products and services across a diverse spectrum of industries. With an unwavering focus on innovation and sustainability, Patriot Sealing takes immense pride in bolstering local manufacturing and actively contributing to the burgeoning growth of the UAE's industrial sector.

## **SAFAR OILFIELD SUPPLIES FZCO NEWS**

BOOTH #7454 IN THE USA PARTNERSHIP PAVILION AT ADIPEC 2023

### **Safar Signs Distributor Agreements with "AVK Group" and "Taylor Valve Technology" at ADIPEC 2023**

*AVK owns Orbinox & Interapp brands. Taylor Valves owns Rupture Pin & Mallard Control brands.*

Established in 1941, AVK Group is a privately owned industrial group currently comprising 100+ companies worldwide with a turnover of 1 Billion Euros. Development and production of valves, hydrants and accessories for the water and industrial segment forms the core of AVK's business. Specialized in delivering a wide range of customized valve solutions to meet the high standards of Oil and gas, Power Generation, and Desalination applications, an integral part of the industrial landscape in the region.

With over 100 U.S. and foreign patents and over 60 years of service, Taylor Valve Technology, and its Rupture Pin brand, is a leading manufacturer of high-quality safety relief valves, back pressure valves, chokes, mud and frac valves. The addition of our balanced 19BV pressure relief valve series and our acquisition of the Mallard line provide a wide and extensive variety of valve products for the oil and gas industry.

With a stocking warehouse facility located in Jebel Ali Free Zone, UAE, Safar Oilfield Supplies FZCO has proudly served as a leading distributor in the Middle East region for the last 41 years delivering high quality products to the Middle East and Central Asia Drilling industry. We are very optimistic that both these tie-ups will enhance the capability of our Safar Flow Solutions division to offer tailored valve solutions for Drilling Rig application.

We are pleased to announce signing of both these distributor agreements at the ADIPEC 2023 show. We will have these products on display at the Safar stand no. 7454 in the USA Partnership Pavilion - Hall 7.

## **FOR IMMEDIATE RELEASE**

September 18, 2023

### **Snowbird Technologies to Showcase Additive Manufacturing at ADIPEC**

*A first-of-its-kind distributed additive manufacturing system that can print and machine large, complex metal parts*

JACKSONVILLE, Fla., September 18, 2023 – Snowbird Technologies today announced that it will showcase the patented Snowbird Additive Mobile Manufacturing Technology system - SAMM Tech at ADIPEC this October.

SAMM Tech is the first of its kind truly distributed additive manufacturing system that can print and machine larger complex metal parts in remote locations. The patented gantry technology can perform metal additive and subtractive manufacturing while surviving harsh climates and rough terrain. Using laser-powered directed energy deposition, standard welding wire can be used to repair parts or 3D print new parts as large as 4.5 cubic feet.

“This method of 3D printing allows for a wide range of materials from carbon steel to titanium,” said Scott Morse, President of Snowbird Technologies. “In addition, any printed part can be post-processed using the cutting mill. This combination will enable quick, high-tolerance interim and end-use parts to be produced onsite anywhere in the world.”

The SAMM Tech system is incorporated inside of an intermodal shipping container, allowing it to be easily mobilized. This technology has the potential to revolutionize oil and gas parts procurement and logistics.

SAMM Tech will be on display in the Snowbird Technologies stand 7615 in the USA pavilion.

### **About Snowbird Technologies**

With more than 31 years of experience in designing and manufacturing specialized cooling and water systems, the Snowbird Technologies brand is synonymous with innovative solutions for extreme environments. Today, Snowbird offers a range of custom-built environmental control units, air water generators, and now the impressive SAMM Tech 3D printer system providing support for users in military and industrial markets. For more information, visit [www.snowbirdtech.com](http://www.snowbirdtech.com).

**FOR IMMEDIATE RELEASE**

## **Sullair Expands LS Series Industrial Air Compressors with Addition of Higher Powered LS190-260 Series**

MICHIGAN CITY, INDIANA (MARCH 23, 2023) – Sullair, an industry leader in innovative compressed air solutions since 1965, announced the expansion of the popular and highly efficient LS Series lubricated rotary screw industrial air compressors with the release of higher powered LS190-260 Series models.

Building on the legacy and design of the original LS90-160 (90-160 kilowatt) compressors, the expanded LS190-260 Series brings 190-260 kilowatts of compressed air power with the same features customers have come to expect. All LS models feature a redesigned, highly efficient single stage air end, machined in Michigan City, and optional Sullair-exclusive Electronic Spiral Valve Technology that helps match compressed air supply to demand. Added features include the easy-to-use 10" color touch screen controller, super premium TEFC motor (fixed speed and Electronic Spiral Valve models) and easy-to-service design. Like earlier models the LS190-260 Series offers customers lower total cost of ownership while being easily serviceable. And the robust Sullair Touch Screen controller provides the ability to sequence up to 16 compressors, providing ultimate control and flexibility.

"The LS190-260 Series was designed and built based on direct customer feedback and demand," said Peter Modrow, Sullair Senior Product Manager. "Our customers have been anxiously waiting for a higher-powered LS Series compressor and we are thrilled to bring this next generation to market."

The Sullair LS190-260 Series air compressors are used in general manufacturing, steel production, power generation, mining and more.

The LS Series will be featured at the Sullair and Hitachi stand #D44 during the 2023 ComVac exhibition in Hannover, Germany April 17-21, 2023.

### **About Sullair**

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of air compressors for use in manufacturing, oil and gas operations, food processing, construction and more. Sullair has manufacturing capabilities in Michigan City, Indiana; Suzhou, China; and a JV (IHI-Sullair) based in Suzhou. For more information, visit [www.sullair.com](http://www.sullair.com). Sullair is a Hitachi Group Company.

### **About Hitachi, Ltd.**

Hitachi drives Social Innovation Business, creating a sustainable society with data and technology. We will solve customers' and society's challenges with Lumada solutions leveraging IT, OT (Operational Technology) and products, under the business structure of Digital Systems & Services, Green Energy & Mobility, Connective Industries and Automotive Systems. Driven by green, digital, and innovation, we aim for growth through collaboration with our customers. The company's consolidated revenues for fiscal year 2021 (ended March 31, 2022) totaled 10,264.6 billion yen (\$84,136 billion USD), with 853 consolidated subsidiaries and approximately 370,000 employees worldwide. For more information on Hitachi, please visit the company's website at <https://www.hitachi.com>.
