The Chainalysis 2023 Geography of Cryptocurrency Report

Comprehensive Insights into Regional Patterns of Crypto Adoption

Paris, November 14, 2023 - Chainalysis, the blockchain data platform, is announcing the publication of the fourth annual [Chainalysis 2023 Geography of Cryptocurrency Report](#), with its centerpiece, the [2023 Global Crypto Adoption Index](#), which is composed of on-chain and web data to measure which countries are leading the world in grassroots crypto adoption.

The purpose of the index is to assess which global markets have the highest grassroots adoption. Chainalysis employs a blend of its proprietary on-chain data and third party data to determine which countries are at the forefront of this movement. Unlike focusing solely on countries with the highest transaction volumes – typically the largest and most affluent nations – the index spotlights the places where everyday individuals are most enthusiastically embracing cryptocurrencies for everyday use. To achieve this, Chainalysis developed the Global Crypto Adoption Index, which identifies countries where a significant portion of the population is actively investing a substantial portion of their wealth in cryptocurrency.

Key highlights

- The ranking of the top 20 countries in terms of grassroots crypto adoption is determined by evaluating five sub-indexes, with adjustments made based on purchasing power parity per capita.
- The Central & Southern Asia and Oceania (CSAO) region takes a prominent position at the summit of the index, with six out of the top ten countries hailing from this region. Several distinct factors underlie each country's ranking. A more in-depth exploration of this region delves into:
 - The gaming-driven crypto economy in the Philippines
 - The popularity of stablecoins amid rapid inflation in Pakistan
 - India's booming crypto economy despite a challenging regulatory and tax environment
- Lower middle income (LMI) countries have seen the greatest recovery in grassroots crypto adoption over the last year.

Institutions across Central, Northern, and Western Europe are expanding their horizons through experimentation with DeFi and Web3

Central, Northern, & Western Europe (CNWE) is the second-largest cryptocurrency economy in the world this year, behind only North America. The region accounted for 17.6% of global transaction volume between July 2022 and June 2023, and received an estimated \$1 trillion in on-chain value during the same time period.

Throughout the area, decentralized finance (DeFi) stands as the most favored service category, representing 54.8% of the received cryptocurrency value. DeFi has been a pivotal element in driving crypto adoption in CNWE over recent years, particularly through the proliferation of decentralized exchanges (DEXes). Although much of this engagement was spurred by retail participants, institutions across the region are increasingly embracing DeFi, encouraged by regulatory structures that endorse a variety of web3 ventures.

Six of the 50 biggest grassroots adopters of cryptocurrency according to the Global Crypto Adoption Index are based in CNWE: the United Kingdom (14), Spain (22), France (23), Germany (26), Italy (37), and the Netherlands (39).

BOOTH #5F070 IN THE USA PARTNERSHIP PAVILION AT MILIPOL PARIS 2023

A Classic Redefined

UTG PRO® MP5 MONOLITHIC M-LOK® HANDGUARD

Known as our line of Michigan made handguards, stocks, buffer tubes, and more, UTG PRO® brings to the market a classic improvement for the iconic MP5 with a unique monolithic handguard. The UTG PRO® MP5 monolithic M-LOK® handguard combines M-LOK® and optics real estate into one rigid and slim drop-in mount.

Precision CNC machined from 6061-T6 aluminum and with an overall installed weight of only 9.6 ounces, the handguard is finished in H-146 graphite black Cerakote® in replace of a matte black anodize. A decision we made in efforts to better match the painted finish found on MP5 receivers. Our patented claw mount locking interface utilizes four proprietary lugs that are inserted from the sides and through the upper monolithic portion of the handguard where four vertically installed T10 screws securely clamp the lugs against the receiver.

The handguard, which practically spans the length of the MP5's sight radius, provides an extended 16-slot Picatinny top rail that begins just forward of the rear sight drum and ends just before the charging handle recess notch. A cutout in the rail allows for positive identification of the serial number. Speaking of the recess notch, the part of the handguard that overlaps the notch is chamfered to specifically prevent hot spots or snag points from happening when manipulating the charging handle with or without gloves. In addition to the chamfer, access to the charging handle remains quick and effortless and shooters will have no worry about tearing up their fingers or knuckles as the top of the handguard transitions from Picatinny to M-LOK® the remainder of the way to the front sight.

Around the circumference of the handguard are a total of 17 full and 5 half M-LOK® slots. In addition, two integral anti-rotational QD sockets are featured and are located toward the front of the handguard at the 3 and 9 O'clock positions. The multiple M-LOK® positions make quick work of installing lights, lasers, foregrips, and more onto the receiver of the MP5. A task that is somewhat of a conundrum for the classical MP5 compared to more modern offerings. The UTG PRO® MP5 monolithic handguard is designed for the 9mm receiver MP5 and clones and is compatible with most, if not all, collapsible and fixed stocks.

BOOTH #5D062 IN THE USA PARTNERSHIP PAVILION AT MILIPOL PARIS 2023

Vislink to Showcase Public Safety Capabilities at the 2023 Milipol Paris Show

Breakthrough Technology for Mission-Critical Insights Across Military, Law Enforcement and Public Safety Applications on Display at Prestigious Homeland Security and Safety Event

PARIS, FRANCE — November 1, 2023 — Vislink Technologies, Inc. (NASDAQ: VISL), a global leader in the collection, delivery, management and distribution of high-quality live video and data, will join an accomplished group of industry decision-makers at the 2023 Milipol Paris Show, a four-day conference highlighting security innovation internationally.

This comes on the heels of Vislink's acquisition of the majority assets of Broadcast Microwave Services, LLC (BMS), a wireless microwave equipment provider with over 30 years of expertise in real-time microwave transmission. This acquisition solidifies Vislink's expanding global imprint in the government and military sector.

Held from 14 to 17 November 2023, the Milipol Paris Show will feature 70+ speakers, 150+ official delegations, 1000+ exhibitors and over 30,000 visitors from around the world. At the conference, Vislink will showcase its suite of security solutions to major industry players, innovators and thought leaders dedicated to international homeland security issues.

"We are proud to attend this world-renowned event and demonstrate Vislink's secure, high-quality, real-time video data and its capabilities in the most challenging safety and law enforcement environments. With applications spanning defense, public safety and border security to counter-terrorism and beyond-line-of-sight communications, Vislink technology can support a wide range of public safety and military professionals," explains Vislink CEO Mickey Miller.

The cornerstone of Vislink's solution for military, law enforcement and public safety use is the Airborne Video Downlink System (AVDS), a real-time, aerial-based video transmission solution that captures high-definition video from drones, helicopters and other aircrafts. Also on display will be solutions for government surveillance, law enforcement, unmanned aerial vehicles (UAV), and unmanned ground vehicles (UGV) markets.

In today's world of heightened concern and awareness about keeping the public safe, on-the-ground professionals around the world consider AVDS an essential tool for providing a visible and reliable vantage point into airborne activity. This data is used in command centers, mobile units and video management systems. Vislink's suite of technological solutions is field-proven to deliver mission-critical insights, maintain tactical advantage, and enable effective decision-making.

With over 30,000 attendees, the 2023 Milipol Paris Show provides the perfect stage for Vislink to showcase its unparalleled expertise in the worldwide public safety arena.

Vislink will be exhibiting at Booth 5 D 062 in the USA Pavilion. Attendees can also schedule a meeting with a Vislink representative at this link.

ABOUT VISLINK TECHNOLOGIES, INC.

Vislink Technologies is a global technology leader in capturing, delivering and managing high-quality live video and associated data. With a renowned heritage in video communications encompassing over 50 years, Vislink has revolutionized live video communications by delivering the highest-quality video from the scene, even in the most challenging transmission conditions—enabling broadcasters and public safety agencies to capture and share live video seamlessly and securely. Through its Mobile Viewpoint product lines, Vislink also provides live streaming solutions using bonded cellular, 5G, and AI-driven technologies for automated news and sports productions. Vislink’s shares of common stock are publicly traded on the Nasdaq Capital Market under the ticker symbol “VISL.” For more information, visit www.vislink.com.

Vislink Acquires Majority Assets of Airborne Video Downlink Provider Broadcast Microwave Services *Strategic Asset Purchase Adds Strong Domestic and International Customer Base in MilGov Sector*

MT. OLIVE, NJ — September 15, 2023 — Vislink Technologies, Inc. (“Vislink” or the “Company”) (NASDAQ: VISL), a global technology leader in the capture, delivery, and management of high-quality, live video and associated data in the media and entertainment, law enforcement, and defense markets, has acquired the majority assets of Broadcast Microwave Services, LLC (BMS), a provider of wireless microwave equipment for video and data transmission.

BMS Overview

BMS designs and manufactures microwave technology systems that serve a diverse customer base in government surveillance, law enforcement, uncrewed aerial vehicles (UAV), and unmanned ground vehicles (UGV) markets. BMS offers a complete suite of mission-critical solutions, allowing reliable, long-range data transmission in the most demanding environments. With over 30 years of experience in real-time microwave transmission, BMS has longstanding relationships with customers in the United States, Europe, Asia, and the Middle East (EMEA).

BMS Asset Acquisition Summary and Rationale

Grows Vislink's leading position as one of the largest and most technically advanced Airborne Video Downlink Systems (AVDS) provider.

Provides Vislink with a well-established customer base in the MilGov sector, further strengthening the Company's international footprint, especially in EMEA.

Presents Vislink with an attractive opportunity to upsell and cross-sell its industry-leading AVDS products across the expansive BMS customer network.

Expands Vislink's opportunities to penetrate the burgeoning public safety, defense, and federal government markets.

Bolsters Vislink's ability to flexibly deploy capital to evolve its platform to best meet customers' needs.

Management Commentary

"BMS is a well-established international player in the AVDS space," said Vislink CEO Mickey Miller. "By adding its assets to Vislink, we are consolidating the market and extending our position as the leading worldwide provider of AVDS products. We look forward to driving new sales to a larger customer base with an increased focus on the growing public safety market. Our strong balance sheet allows us to meet the needs of current BMS customers, while our industry-leading technology provides us with an attractive opportunity to up-sell and cross-sell our solutions. With the addition of BMS assets, we are even better positioned to scale our business in the growing MilGov sector."

Note on Forward-looking Statements

Certain statements in this press release are forward-looking statements that involve substantial risks and uncertainties for purposes of the safe harbor provided by the Private Securities Litigation Reform Act of 1995. Any statements, other than statements of historical fact included in this press release, including those regarding the Company's acquisition of BMS assets and expected opportunities and synergies, strategy, future operations, future revenues, growth, profitability results and financial position, risks of supply chain constraints and inflationary pressures, projected expenses, prospects, plans including footprint and technology asset consolidations, objectives of management, new capabilities, product and solutions launches including wireless microwave equipment and AI-assisted and 5G streaming technologies, expected contract values, projected pipeline sales opportunities, acquisitions integration, and expected market opportunities across the Company's operating segments including the live event production market, the effects of the COVID-19 pandemic, the sufficiency of the Company's capital resources to fund the Company's operations and any statements regarding future results are forward-looking statements. Vislink may not actually achieve the plans, carry out the intentions or meet the expectations or projections disclosed in any forward-looking statements such as the foregoing and you should not place undue reliance on such forward-looking statements. Such statements are based on management's current expectations and involve risks and uncertainties, including those discussed in Vislink's Annual Report on Form 10-K for the fiscal year ended December 31, 2022, filed with the Securities and Exchange Commission ("SEC") on March 31, 2023, and in subsequent filings with, or submissions to, the SEC from time to time.

The statements made in this press release speak only as of the date stated herein, and subsequent events and developments may cause the Company's expectations and beliefs to change. While the Company may elect to update these forward-looking statements publicly at some point in the future, the Company specifically disclaims any obligation to do so, whether as a result of new information, future events or otherwise, except as required by law. These forward-looking statements should not be relied upon as representing the Company's views as of any date after the date stated herein.
